

# Optimizing Hygiene and Regenerative Therapies in Everyday Clinical Practice

In Association with ADL Laboratory

## Thursday, November 14, 2019

### PROGRAM DESCRIPTION

This program focuses on innovative approaches to establishing optimal periodontal therapy in the hygiene department and discusses regenerative therapies in everyday clinical practice. The program provides practices with tips and tools to optimize periodontal therapy and explore the advances, capabilities and benefits of periodontal regeneration. Emphasis is placed on implementing effective treatment protocols and how biologic modifiers, particularly enamel matrix derivative, are used to regenerate lost hard and soft tissue. Establishing effective practices and patient communication to enhance case presentation and case acceptance of these therapies is a highlight of the program.

### LEARNING OBJECTIVES

- Implement systems to create a more periodontally aware practice
- Establish evidence-based periodontal treatment protocols
- Understand the biologic basis for bone and soft tissue response
- Understand the indications, method of use and regenerative potential of enamel matrix derivative and other biologic modifiers
- Implement effective communication to help treatment acceptance
